

FROZEN DRINK MACHINE INSTRUCTIONS

DO NOT LAY UNIT ON IT'S SIDE OR BACK, IT WILL DAMAGE THE COMPRESSOR.

NOTE: COMPRESSOR IS NOT COVERED UNDER DAMAGE WAIVER

**** IMPORTANT ****

Be sure equipment is connected to properly grounded 120 volt power supply with 15 amp circuit.

Plug machine directly into an outlet. If you must use an extension cord, use only #10 wire cord as short as possible. DO NOT machine use in direct sunlight.

DO NOT CHANGE SETTINGS! THEY ARE AT THEIR OPTIMAL SETTINGS! USE A PROFESSIONAL MIX - ANYTHING ELSE MAY RESULT IN A PRODUCT NOT USEABLE.

MIXING

Mix one bottle (½ gal. of concentrate) with 2 gallons of water, (hint: use empty mix bottle x 4) Pre-mixing and pre-cooling the mixture prior to pouring into the machine will expedite the freezing. Makes approximately 10 - 8 oz. servings. It will take approximately 45 minutes for fluids to freeze.

***** Adding alcohol will drastically slow the freezing process*****

We suggest you add alcohol after you have poured the drinks or allow additional mix time!

Pour the mixture in to machine's bowl, up to the maximum fill-line. DO NOT OVERFILL!

OPERATION

1. Install the cover and check that it is correctly placed over the bowl.
2. Make sure barrel (container) is correctly snapped in.
3. Set the power switch to 'I' ON position. DO NOT run machine dry (without mix) .
4. Set the mixer/refrigeration switch to 'II' FROZEN position. If mixture begins to over freeze, turn switch to 'I' CHILLED position.
5. Set the light switch to 'I' ON position, if it does not come on...no worries.
6. Refill bowl when empty with pre-mixed, pre-cooled product.

CLEANING

1. Empty any remaining contents.
2. Rinse bowl by adding clean warm water, and completely drain.
3. Please DO NOT disassemble the machine, we will take care of the rest of the cleaning.
